SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React, Next.js, Vue 3, React Router SSR, Tailwind CSS, Radix UI

State and Forms: TanStack Query, Zustand, React Hook Form, Zod

Backend: Node.js, Fastify, Express, Frappe, REST APIs, Exotel integration

Data: PostgreSQL, MariaDB, MongoDB, Redis, IndexedDB

Testing: Vitest, Jest, Supertest, Testcontainers

Cloud and Tools: AWS EC2, S3, Nginx, PM2, Docker, Strapi, Git, Sentry

EDUCATION

B.Tech in Information Technology

Northern India Engineering College, Delhi
2017 - 2021

First Division | CGPA 7.0

Higher Secondary Education

APS Dhaula Kuan, Delhi
PCM with Physical Education
82% | 2017

PROFILE SUMMARY

Full-stack developer building web applications with React, Next.js, TypeScript, Node.js and PostgreSQL. Owns most frontend development and selected backend services across operations, CRM, reusable UI and content platforms. Experience includes offline survey workflows, browser telephony, API integrations and AWS staging deployment.

WORK EXPERIENCE

Green Fortune Technologies

2025 - Present

Fullstack Developer | Indiframe

- Owned most frontend development for an operations platform connecting orders, surveys, production, dispatch and installation.
- Implemented offline survey workflows across frontend and backend using IndexedDB, queued edits and photos, ordered synchronisation and recovery from rejected saves.
- Built bulk APIs and bounded reconnect concurrency to address request timeouts and database connection contention.
- Owned most company-specific Vue and Python development on Frappe CRM: lead-stage rules, quotations, permissions and retryable handoff to operations.
- Integrated Exotel browser calling with call-ID correlation, early-event buffering and provider-confirmed customer outcomes.
- Created and primarily maintain a React/TypeScript visualization package used by two applications for project hierarchies, unit selection and progress tracking.
- Implemented the SSR brand website and Strapi CMS, migrated lead delivery from Freshworks to Frappe, and set up AWS EC2 staging with Nginx, S3 and database backups.

Hippo Homes by Dalmia

2024 - 2025

Fullstack Developer

- Built and maintained POS, kiosk, manual-order and e-commerce applications using Next.js, Node.js and PostgreSQL.
- Implemented negotiation-based order workflows, customer creation and REST APIs supporting retail applications.
- Worked on backend performance through Redis caching and database optimisation.

Nethues Technologies Pvt Ltd

2021 - 2024

- Migrated a legacy PHP application to Next.js and built data-driven interfaces with React Query, Zustand, Chakra UI and Chart.js.
- Developed event ticketing features with Stripe payments, shared UI through Turborepo and OneSignal push notifications.
- Maintained cross-browser compatibility across web interfaces.
